

MR-20FB Overview:

The MR Series is a robust vibratory bowl finishing machine built to handle continuous duty operation. Hammond Roto-Finish's proven welded-construction design was reimaged in 2011 to simplify manufacturing without sacrificing durability. The MR Series combines that innovative design with high-end features.

The MR-20 is available in four models; Manual, Semi-Auto, Automatic, and Accelerated Chemistry. General machine data and features are laid out below.

Machine Features:

Max operating capacity 17.0ft³ (481 L)

Heavy-duty 3/16" (4.75mm) welded construction

Main bowl construction component is a pressure vessel tank head

U shaped process channel with textured, straight wall polyurethane lining

Polyurethane lining is a minimum 5/8" (15.5mm) thick, with 50% additional in high wear areas

Bowl is suspended on heavy duty coil springs

Two (2) sets of pop-in drains: solid, 1/16" (1.5mm), **1/8" (3mm)** & 1/4" (6.5mm) slots

Parts separation system with pneumatically operated gate

Water-driven compound system – mixes between 0% and 5% concentration

19 mm socket included for changing eccentric weights

Integrated lifting eyes

Grease lubrication

Available voltages:

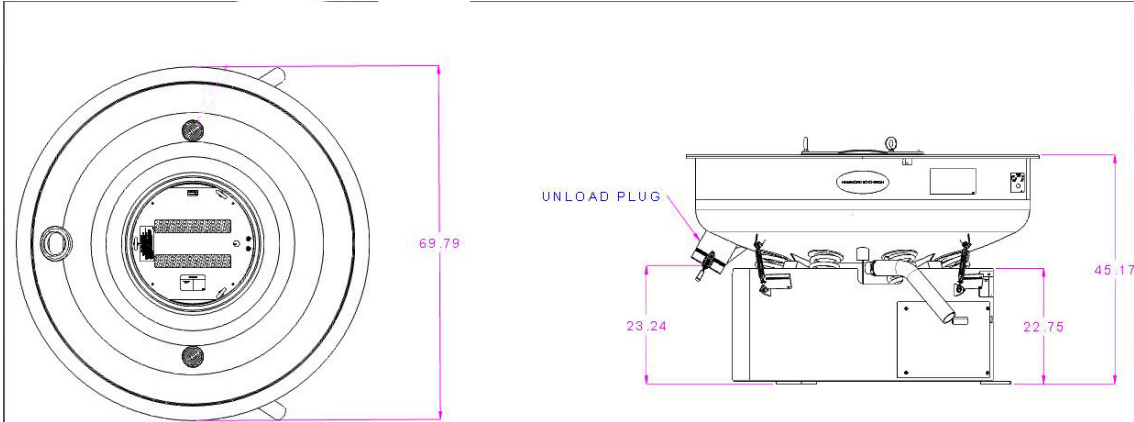

230 VAC / 460VAC, 3ph, 60hz

(denotes factory installed – unless specified on order)

MR-20 Specifications and Dimensions:

Drawings:

MR-20FB-M, MR-20FB-S, MR-20FB-C

Utilities:

	Bowl Working Volume	Power	FLA (230V/460V)	Shipping Weight	Maximum Water Pressure	Average Flow Rate	Maximum Flow Rate	Drain
English	17.0 ft ³	7.5 hp	20.4 / 10.2	1730 lbs	35 psi	22 gal/hr	4 to 40 gal/hr	(2)
Metric	481 L	5.59 kW		785 kg	2.4 bar	83 L/hr	15 to 151 L/hr	2" NPT

Manual Model: **MR-20FB-M** **\$ 31,750.00 USD**

This is the baseline machine model. It features manual controls for both motor start and the pneumatically operated gate.

Semi-Auto Model: **MR-15S** **\$ 38,850.00 USD**

This is the baseline machine model. It features the shut off timer and pneumatically operated gate on the control panel. It can be upgraded to include a VFD.

VFD Upgrade Price \$ 2,400.00 USD

Accelerated Chemistry Model: **MR-20FB-C** **\$ 47,650.00 USD**

This model builds on the MR-20FB-S. In addition to the automatic processing and unloading, it features a second, electric compound pump, part recipe selection from the HMI, and acid proof construction. These features are required in a machine that produces the high luster finishes generated from accelerated chemistry processes.
