

Mass Finishing Machinery can produce extraordinary results on work pieces by removing burrs, producing a radius on an edge or corner, or by producing an exceptionally low ra surface finish. The machine produces the energy, but the energy is transferred by the polyurethane lining that is between the steel of the machine and the media compound. This layer will eventually wear out and will need to be replaced.

Hammond Roto-Finish specializes in relining and repairing our product line of machinery, as well as a wide variety of competitor machinery. We use premium grade polyurethanes in a range of durometers and colors to meet your specific application and needs.

Our environmentally friendly, quality conscious relining process ensures that our customers will receive their unit back in a timely manner to minimize down time. Machine refurbishment is another service offered by Hammond Roto-Finish. Reline and rebuild of drive systems, gates, and repairs to fatigue cracks are also available on Vibratory Bowls and Tubs, as well as other Mass Finishing Machinery.

**AFTER**

## BENEFITS:

NEW CHANNEL

OLD CHANNEL

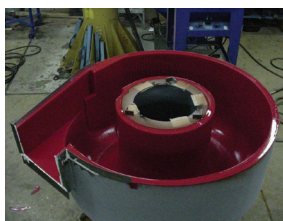

### New Reline and Refurb Produces Better Results and Efficiency

- Continuous high production - very labor efficient
- Part-to-part damage is minimized - further machine damage is prevented
- Predictable results for higher quality product
- A full U-shaped channel assures full roll (no sliding) as the part advances
- Competitors spray in their channels which flattens the bottom and reduces media roll

## Relining Capabilities

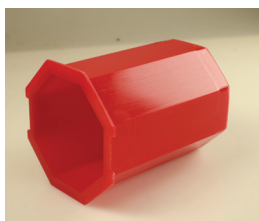

Vibratory Tubs

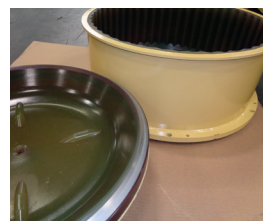

Vibratory Bowls

Wheels & Pulleys

Barrel & Lids

Bowl & Spinners

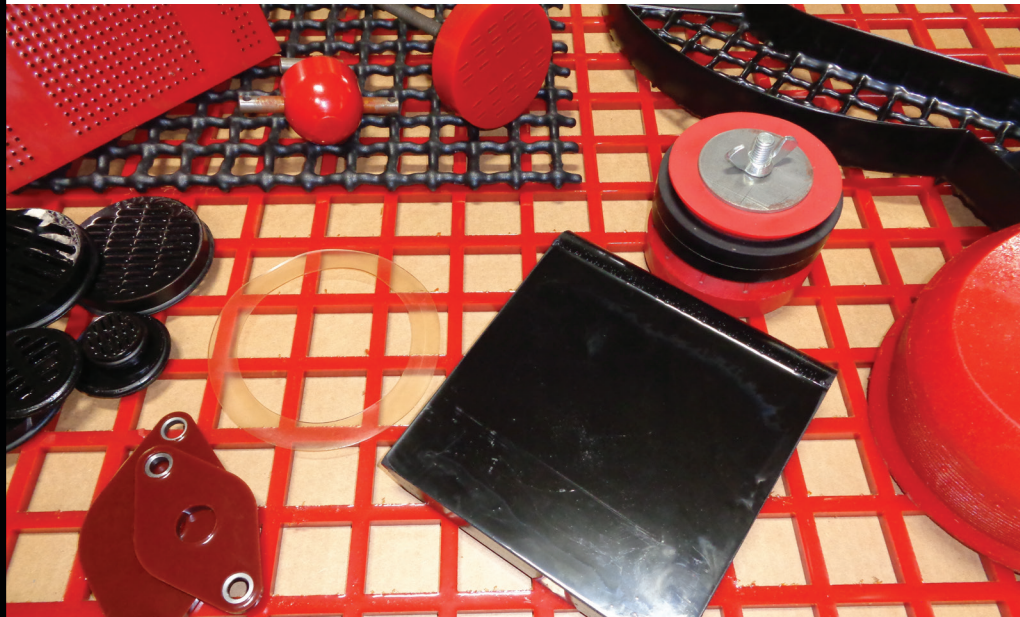

Hoppers & Pans

## Specialty Cast Parts

Whether we're casting small, large or intricate shapes, Hammond Roto-Finish can deliver precision specialty cast parts that perfectly match your designs. We offer design assistance with our highly trained engineers to help improve both your part's function and its manufacturability. Turn your designs into reality.

### Cast Part Capabilities:

- Screens
- Drains
- Gates
- Media Plugs
- Seals
- Gaskets
- EOAT Boot
- Blast Masking
- Sheet Stock
- Urethane Patch Kits
- And Much More!

**Other  
Services  
HRF  
Offers:**

**GRIT BLASTING**

**ENVIRONMENTAL  
BURN OFF**

**PAINTING**

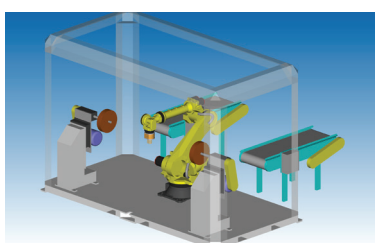

**MACHINING**

### NEW FINISHING EQUIPMENT

- Mass Finishing Machines/Systems
- Buffing and Grinding Machines
- Robot Cells/Automation

### ROBOT & AUTOMATION

- Authorized FANUC Integrator
- Polish, Buff, Blast and Paint

### CONSUMABLES

- Liquid Finishing Compounds and Soaps
- Media - Steel, Ceramic and Plastic
